

NormaTec's patented Sequential Pulse Technology sets it apart from any other massage compression device by synergistically combining three distinct massage techniques - Pulsing, Gradient Hold, and Distal Release - to speed the body's recovery process.

- Pulsing action of the equipment mimics the muscle pump of the arms or legs, greatly enhancing the movement of fluid and metabolites out of the limbs after intense use.
- The Gradient hold utilizes constant pressure to keep the body's fluids from being forced to one end of the limb while the Pulsing continues.
- Distal Release prevents any backflow of fluids by releasing the hold pressures in each zone as soon as possible allowing each limb to gain maximal rest time without a significant pause between compression cycles.

Users include members of elite NCAA programs, the majority of NFL, NBA, and NHL teams; the US Navy Seals; and the US Olympic Committee. Now, CryoUSA has made it available to clients that are looking for quicker muscle recovery and a decrease in muscle fatigue and stiffness. Our rehabilitation clients notice a reduction in swelling, pain and an increased range of motion.

# Product Specifications | NORMATEC Compression Recovery Systems

## TECHNICAL DATA

- User friendly control panel
- 7 digital intensity levels with 30-100 mmHg range
- Standard features include a timer, adjustable rest time, and an Upper Zone Deactivation option
- Includes arm sleeves and core attachment
- Zone Boost button for added intensity on a specific zone
- Additional sizes for sleeves available to accommodate all clients
- Anti microbial fabric, for long wear and easy cleaning
- Electric Unit: World Voltage Compatible power adapter (100-240v)
- Finish: Black

## WARRANTY

All NormaTec Recovery Systems come with a 2 year system warranty.

## PRICING

Model	Price
PULSE Leg Recovery System PULSE Control Unit, 2 Boots	\$1,595.00
PULSE Arm Recovery System PULSE Control Unit, Left Arm, Right Arm	\$1,595.00
PULSE Leg & Hip Recovery System PULSE Control Unit, 2 Boots, Hip	\$2,049.00
PULSE Leg & Arm Recovery System PULSE Control Unit, Left Arm, Right Arm, 2 Boots	\$2,229.00
PULSE Full Body Recovery System PULSE Control Unit, Left Arm, Right Arm, 2 Boots, Hip	\$2,749.00

*Additional options to purchase a la carte accessories, attachments and packages of appliance sleeves are available upon request. Contact CryoUSA for pricing.*
