

The Vyper is a state-of-the-art fitness device that uses pressure and vibration to improve the body's overall performance and enhance recovery and rehabilitation. Use of the Vyper can also aid in injury prevention.

BENEFITS

Injury Prevention

- Improves muscle stability
- immediately increases circulation to properly warm-up the body
- Prepares the body to be stretched by loosening muscles, nerve tissue and fascia

Performance Enhancement

- Increases flexibility, mobility and agility
- Increases circulation to prepare the body for training/competition

Recovery & Rehabilitation

- Alleviates pain and tension
- Reduces soreness and stiffness
- Increases blood flow to muscles, helping to break down lactic acid
- Increases range of motion for optimal stretching and strengthening exercises
